JAYVARDHAN JOSHI

AI/ML Engineering Intern

+91-6398321189 | jayeshntl2708@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

AI/ML Engineering Intern and B.Tech Computer Science (AI, ML & Robotics) student with hands-on experience building 8+ end-to-end machine learning projects and a completed AI/ML internship using Python and Scikit-learn. Experienced in supervised and unsupervised machine learning, data preprocessing, feature engineering, model evaluation, computer vision, and large language model (LLM) and vision-language model integration. Built a full-stack, voice-enabled AI application combining speech recognition, text-to-speech, and multimodal AI. Holds industry certifications including the Machine Learning Specialization from Stanford University and multiple Oracle Generative AI credentials. Seeking an AI/ML internship to apply predictive modeling, applied AI engineering, and data-driven problem-solving skills.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, R, SQL
- **Machine Learning:** Scikit-learn, Pandas, NumPy, Regression, Classification, Clustering, Supervised Learning, Unsupervised Learning, Model Evaluation, Feature Engineering
- **Applied AI:** LLM Integration, Vision-Language Models (Groq, Qwen), Speech AI (Whisper, Deepgram TTS, SpeechRecognition), Computer Vision (OpenCV), Gradio
- **Data & Analytics:** Exploratory Data Analysis (EDA), Feature Engineering, Power BI, Tableau, Excel, DBMS
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Pantech Prolabs India Pvt. Ltd. (Pantech.AI) — AI/ML Intern *Nov 2025 – Feb 2026*

Remote

- Implemented supervised and unsupervised machine learning algorithms using Python and Scikit-learn across multiple training datasets.
- Performed data preprocessing, feature selection, and model evaluation to improve baseline machine learning model performance.
- Gained hands-on experience with computer vision fundamentals using OpenCV.
- Collaborated in a remote, cross-functional team environment to deliver machine learning project milestones on schedule.

PROJECTS

AI-Powered Skin Consultation App — Personal Project *2026*

Multimodal AI health-tech application enabling voice/text symptom input with photo-based skin analysis and spoken responses.

- Integrated a vision-language model (Groq, Qwen) to analyze combined photo and text input and generate doctor-style spoken assessments.
- Built a full speech AI pipeline using SpeechRecognition and Whisper for transcription and Deepgram TTS for natural voice output.
- Designed an interactive Gradio user interface, streamlining the consultation flow into a single voice-and-photo interaction.
- Resolved environment and dependency conflicts (Python version, PyAudio, ffmpeg) to deliver a stable, end-to-end AI pipeline.

Predictive ML Model Suite — Personal Project *2025*

Suite of 8 supervised and unsupervised machine learning models spanning healthcare, finance, and retail use cases.

- Built classification models for Heart Disease, Diabetes, Loan Approval, and Titanic Survival prediction using a full EDA-to-evaluation workflow.
- Developed Car Price Prediction and Insurance Cost regression models using engineered features to improve prediction accuracy.
- Applied K-Means clustering to build a Customer Segmentation model and a content-based Movie Recommendation System.
- Prototyped Face Encoding and Siamese Network concepts using OpenCV for facial recognition applications.

EDUCATION

DIT University — B.Tech, Computer Science Engineering (AI, ML & Robotics) *2023 – 2027 (Expected)*

CGPA: 7.5

Inspiration Public School — 12th (Senior Secondary) *2022*

Score: 90%

Woodbridge School — 10th (Secondary) *2020*

Score: 95%

CERTIFICATIONS

- Machine Learning Specialization — Stanford University, Jun 2024
- CS50's Introduction to Artificial Intelligence — Harvard University, Sep 2026
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oracle, Oct 2025
- Oracle AI Vector Search Certified Professional — Oracle, Nov 2025
- Agentic AI Certified Foundations Associate — Oracle, Aug 2026
